Forensic Accounting

While most people associate the term "forensic" with crime scenes and police procedurals, it actually just serves as a description for applying scientific methods and techniques to a crime—or to establish whether a crime was even committed. Forensic accounting, then, is the study of financial records in order to look for fraud, embezzlement, or other financial crimes. The term also covers any analysis of financial information during the course of legal proceedings, such as evaluating insurance claims, complex inheritance cases, or even alimony and child support if there are a lot of financial assets involved.

Our forensic accounting specialists can help with everything from insurance claims to investigations into possible fraud or embezzlement and more. If you want to make sure you get every cent you deserve, then don't risk it—contact us today for a free consultation.

We'll go the extra mile for you. Call Wasatch Defense Lawyers today for a free case review at [801.980.9965](tel:801.980.9965)!
